

National Trust votes against its founding principles

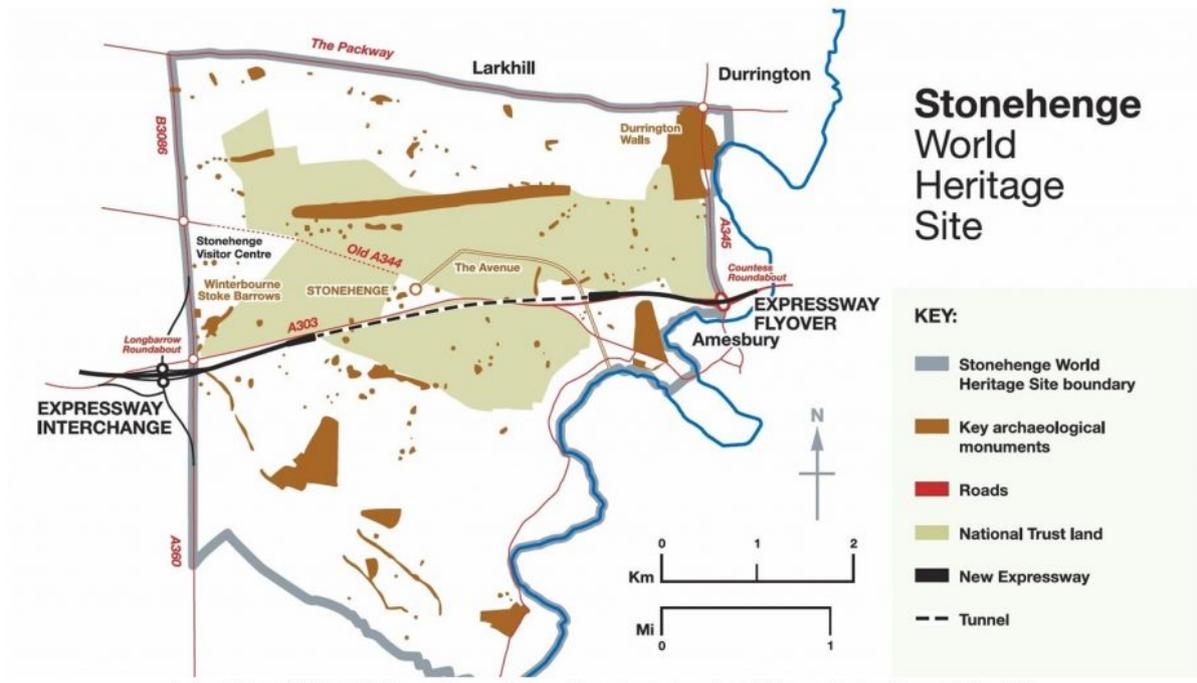

Proposer, Dr Kate Fielden, asks the Trust to stick to its founding principles and think very carefully before lending its name to a road scheme that will irrevocably damage a World Heritage Site.

Last Saturday, the [National Trust AGM debated](#) a motion about the National Trust's involvement in the design and construction of the Stonehenge tunnel and above ground sections of the A303 Expressway.

The members' motion asked the Trustees to reaffirm its founding purposes to protect special places; to respect World Heritage Convention obligations and to acknowledge that any scheme that involves surface engineering across any part of the WHS will damage the WHS, in the Trust's own phrase "For Ever".

Members voted by a fairly narrow margin to maintain the

Trust's support for Highways England's preferred route: a short tunnel past the Stones with about a mile of new dual carriageway through the World Heritage Site.

National Trust AGM 2017: Schematic map of the preferred route, based on Highways England Route Option 1ND
See p.4 of <https://highwaysengland.citizenspace.com/cip/a303-stonehenge/results/sar-volume-5.pdf>

Map showing Government's preferred route for the new A303 Expressway through the World Heritage Site (WHS), including a 2.9km tunnel. Land owned by the National Trust within the WHS is coloured green. Many monuments (shown in brown) are on land south of the A303 managed by farmers and a nature reserve for statutorily protected birds.

While the Trust won the vote, it wasn't by a convincing margin. Over 42% of those who voted (excluding abstentions) wanted the Trust to review its position. If the 11,089 abstentions were included, fewer than 50% were against the Resolution. This must give the Trust pause for thought.

You can view the results of the voting papers submitted by 1.3% of the Trust's five million members that participated

[here](#).

The votes cast against the motion by the Chairman as proxy ensured the motion was lost. Members had not been made aware in the Trust's written response to the motion that UNESCO's World Heritage Committee had urged the Government to look at further options for widening the A303 "with a view to avoiding impacts on the OUV [outstanding universal value] of the property", including a bypass and "longer tunnel options to remove dual carriageway cuttings from the property".

Worryingly, Highways England is ploughing on regardless, ignoring the advice of [UNESCO](#)

**Some unanswered questions
about Stonehenge and the A303**

Baroness Jones of Moulsecoomb

Baroness Moulsecoomb asked three written Parliamentary questions about the Stonehenge tunnel plan and safeguarding World Heritage Sites in October 2016. The answers given on behalf of the Departments for Transport (DfT) and Culture Media and Sport (DCMS) appeared not to address the questions directly.

The questions and answers follow with Stonehenge Alliance (SA) comments in italics beneath:

Q [HL2027](#) To ask Her Majesty's Government whether Highways England plan to investigate using (1) a tunnel which avoids visual and physical damage to the Stonehenge, Avebury and Associated Sites World Heritage Site and its setting, and (2) traffic management measures to discourage travel at peak times, for the A303 at Stonehenge.

A Lord Ahmad of Wimbledon for the DfT answered on 14 October:

Highways England are considering a number of options for improving the section of the A303 close to Stonehenge, which include a variety of tunnel options. The results will be

available for consideration at a public consultation to be held in 2017. However, they do not have any plans for the historic site at Avebury, as the A4361 is the responsibility of Wiltshire Council.

Highways England are committed to encourage the public to plan their journeys in advance and to consider using England's motorways and major trunk roads of peak hours.

SA In answering for the Government, Lord Ahmad omitted to say whether Highways England is investigating an A303 tunnel that would avoid the World Heritage Site (WHS) at Stonehenge; nor did he refer to traffic management measures for the A303 at Stonehenge.

Q [HL2028](#) To ask Her Majesty's Government what steps they are taking towards adopting the recommendation of the Joint World Heritage/ICOMOS Advisory Committee on Stonehenge that the asset life design of the A303 widening scheme should "incorporate asset resilience and future proofing in design".

A Lord Ahmad of Wimbledon again replied for the DfT on 14 October:

The Government has proactively sought the views of the Joint World Heritage/the International Council on Monuments and Sites (ICOMOS) Advisory Committee and welcomes its recommendations.

Highways England are supported by Historic England to consider the asset resilience and future proofing for their proposals for this section of the A303. This will be presented at a public consultation on proposed route options in 2017.

SA It is difficult to see how the expertise of Historic England is relevant here, except insofar as any road improvement ought to be governed by the paramount considerations of the WHS and its protection. It seems that we shall have to wait to see what is being undertaken in order to

incorporate asset resilience and future proofing in road widening design.

Q [HL2029](#) To ask Her Majesty's Government whether they plan to enact primary legislation ensuring that UK World Heritage Sites receive statutory protection from inappropriate planning consents.

A Lord Ashton of Hyde answered for the DCMS on 11 October 2016:

Where appropriate UK World Heritage sites are afforded statutory protection through designation of specific assets through existing legislation. Other aspects of World Heritage Sites are key material considerations in the determination of planning applications.

SA *The Government didn't answer this question. It is true that a considerable number of our historic and natural assets are protected under UK legislation. These include scheduled monuments, grade I listed buildings and certain designated areas such as Special Areas of Conservation. Such designations do not, however, give statutory protection to extensive WHSs such as Stonehenge and Avebury in their entirety, although legally protected assets such as scheduled monuments may lie within them.*

What seems to have been overlooked here is that WHSs themselves are considered by the Government – along with scheduled monuments, protected wreck sites, battlefields, grade I and II listed buildings, grade I and II* registered parks and gardens – to be “designated heritage assets of the highest significance” for which “substantial harm or loss . . . should be wholly exceptional” (National Planning Policy Framework, para. 132).*

Lord Ashton's reply infers that only “aspects” of WHSs are key material considerations in determining planning applications: Government planning policy guidance and the World Heritage

Convention clearly demand a great deal more.

*While ambiguities remain over what should be protected, it seems obvious to us that **statutory protection** for UK WHSs would remove much confusion and ensure the proper safeguarding of WHSs in line with World Heritage Convention obligations. Our WHSs, despite being protected under international law, are highly vulnerable to the ambitions of developers. International law, unlike UK legislation, may be disregarded in the UK.*
